

(Senior) Hardware Developer 3D

Where: Hamburg-Hammerbrook (City Süd)

How: Permanent contract, full time

When: January 1, 2019

SeeFront GmbH develops and licenses a patented 3D display technology which has won multiple innovation awards. We work with clients and partners on several continents on a daily basis.

We are seeking a **highly skilled Hardware Developer with an affinity for mechanical design and hands-on work** who wants her/his work to truly shine.

What we want you to do:

- Design, development and analysis of electronic circuits incl. embedded architecture
- Development and implementation of prototypes; transition to serial production
- Design of mechanical components (in cooperation with partners)

What we expect from you:

- Degree in Electrical Engineering, Communications Engineering or similar
- Several years of relevant experience in project-oriented hardware development
- Very good knowledge of PCB development (Altium designer or similar)
- Experience in designing EMC/CE compliant components
- Knowledge of mechanical design (SolidWorks) is a plus
- You learn fast and have a hands-on approach
- You have good knowledge of both German and English

We offer a versatile and responsible task in our small innovative company at the intersection between start-up and SME. You can expect fair compensation, a work environment in a modern building with a view as well as friendly colleagues and unlimited espresso/coffee.

Want to get on board? Please e-mail your cover letter and CV to:
